What it is

- Windows desktop server that receives barcodes over Wi-Fi.
- Free Android app that scans and sends codes to the PC.
- Types barcodes into the focused app like a USB scanner (Enter / Tab).
- License is required for the Windows server only — the phone app is free.

Who it is for

- Retail, warehouse, café, clinic, and ERP desks that need fast barcode entry.
- Teams that want phone cameras instead of dedicated USB scanners.
- Sites that already use Elfaham desktop products on a local network.

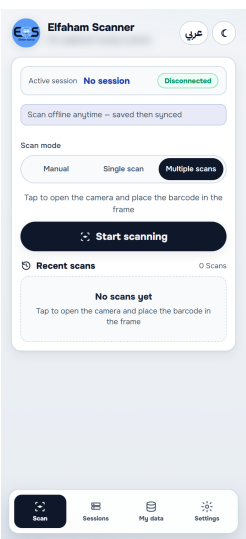

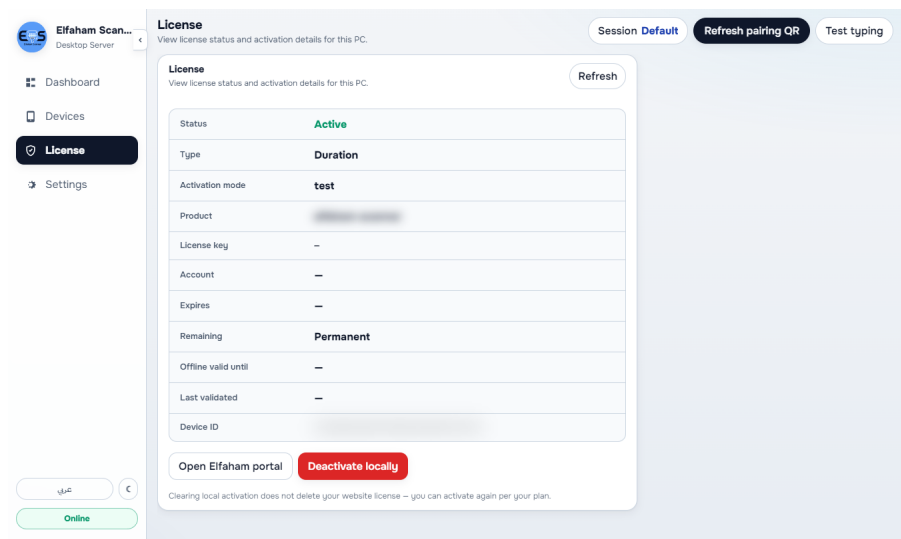

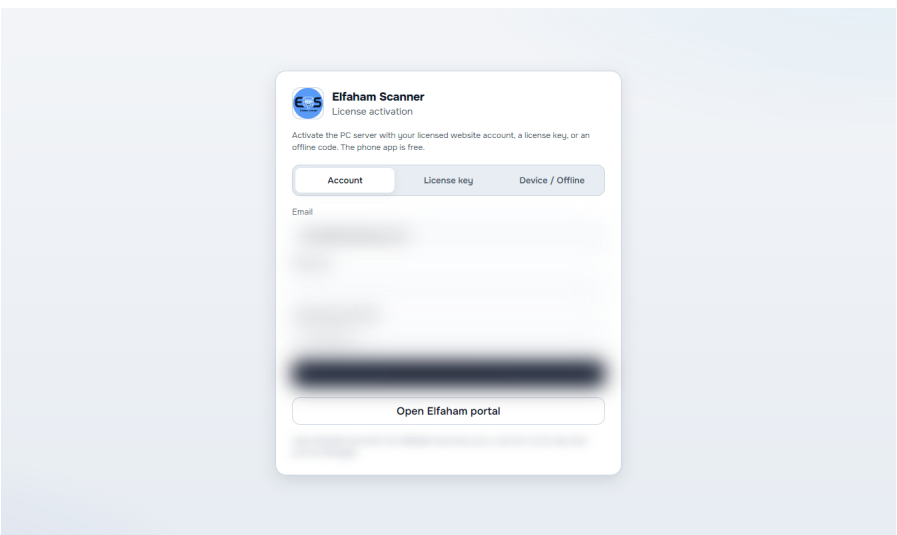

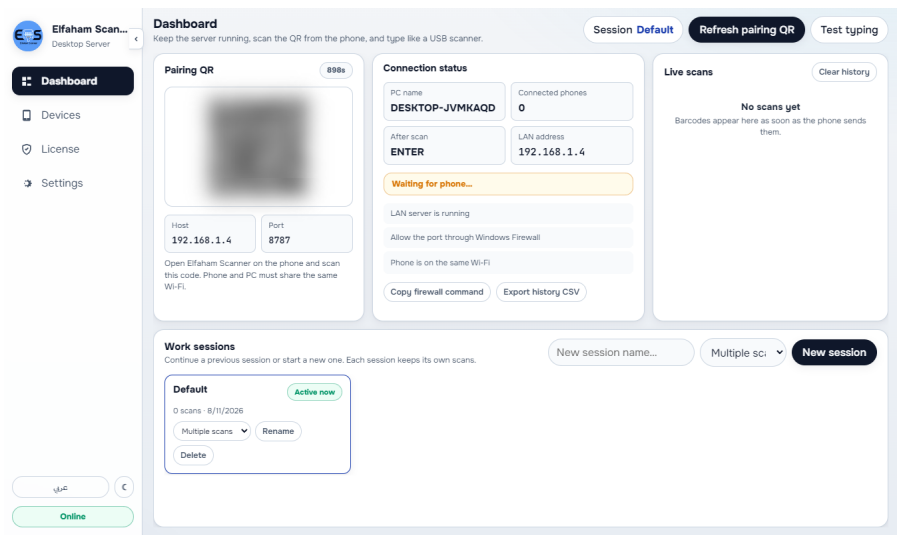

Key capabilities

- QR pairing on the same Wi-Fi — no cloud dependency for scanning.
- Work sessions with live scan history and CSV export.
- Device management for paired phones.
- Account / license-key / offline activation for the PC server.
- Arabic & English UI with light and dark themes.

Licensing

- Product key prefix: ELF-ELSC-...
- Activate with a licensed Elfaham account, a license key, or an offline package.
- View status anytime from the in-app License page.
- Android companion does not require activation.
