

Elfaham Scanner — User Guide

Install, activate, pair, and scan in minutes

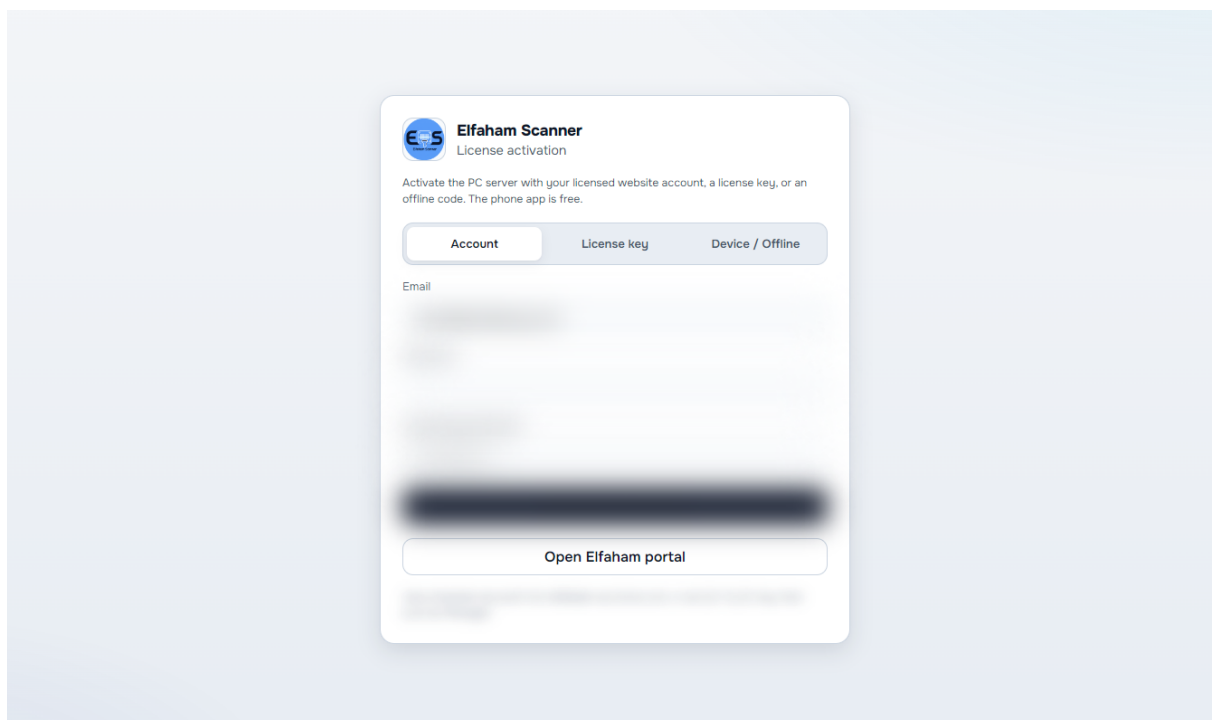

1. Install the Windows server

Download Elfaham Scanner Server from elfaham-solutions.com, run Setup, then open the app.

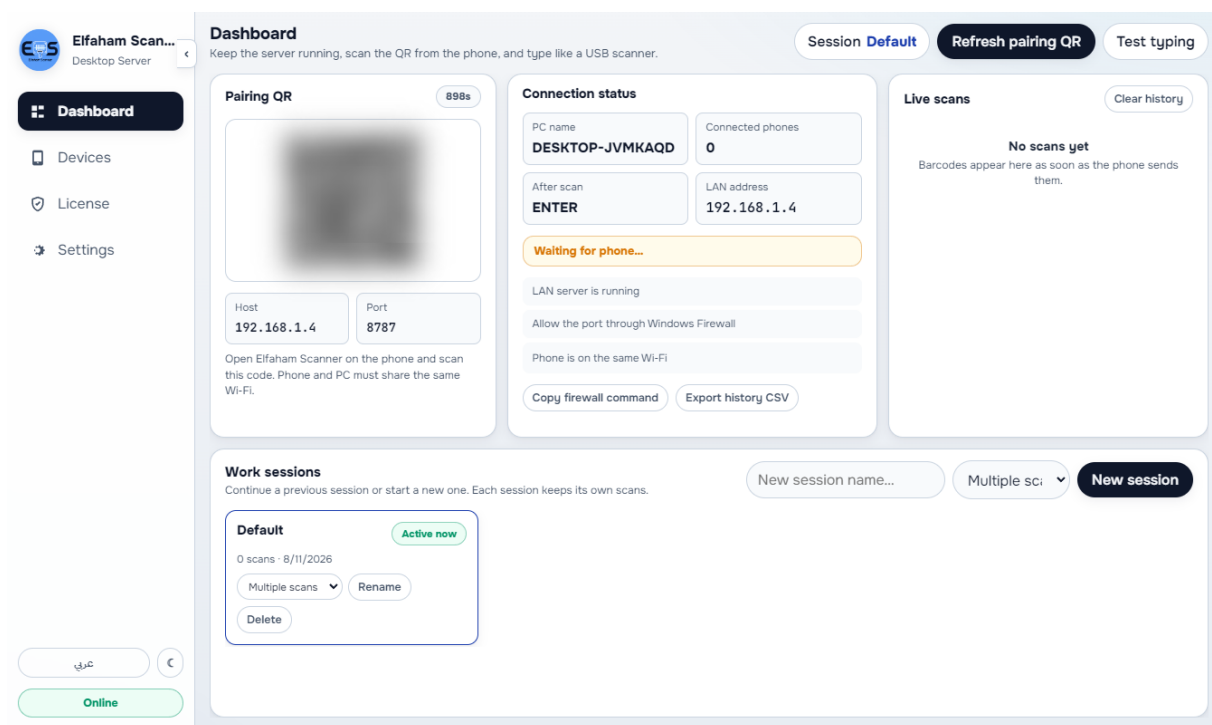

2. Activate the PC license

Use Account login (email + password), a license key, or an offline code from License Manager.

3. Pair the Android phone

Install the free APK, join the same Wi-Fi, and scan the pairing QR on the dashboard.

4. Scan into any Windows app

Focus Notepad or your ERP field, tap Test typing if needed, then scan — codes are typed automatically.

The screenshot shows the 'Settings' page of the Eifaham Scan Desktop Server. The left sidebar contains a menu with 'Dashboard', 'Devices', 'License', and 'Settings' (highlighted). The main content area is titled 'Settings' and includes a 'Session Default' button, a 'Refresh pairing QR' button, and a 'Test typing' button. The settings form contains the following fields:

- Computer name: DESKTOP-JVMKAQD
- Company name: Eifaham
- Prefix before barcode: optional
- After each scan: Enter (dropdown menu)
- Typing delay (ms): 0
- ☒ Launch with Windows

A 'Save settings' button is located at the bottom of the settings form. At the bottom of the sidebar, there is a language selector (عربي) and an 'Online' status indicator.

5. Manage sessions & devices

Create work sessions, review live history, export CSV, and revoke phones from Devices.

The screenshot shows the 'Paired devices' page of the Eifaham Scan Desktop Server. The left sidebar contains a menu with 'Dashboard', 'Devices' (highlighted), 'License', and 'Settings'. The main content area is titled 'Paired devices' and includes a 'Session Default' button, a 'Refresh pairing QR' button, and a 'Test typing' button. Below the title, there is a message: 'No devices yet' and 'Scan the pairing QR from the phone to add a device.' The bottom of the sidebar features a language selector (عربي) and an 'Online' status indicator.

6. Check license details

Open License in the sidebar to view status, expiry, device ID, refresh, or deactivate locally.

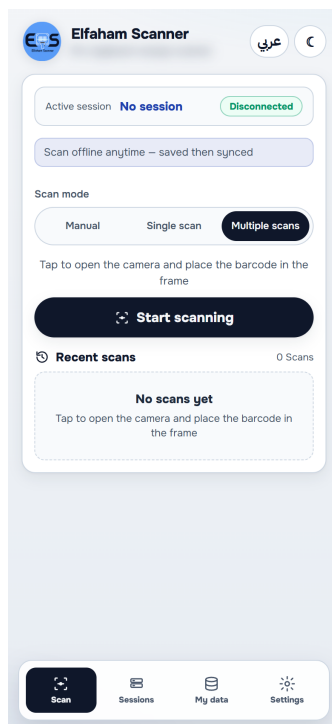

The screenshot shows the 'License' section of the Eifaham Scanner Desktop Server interface. The sidebar on the left includes 'Dashboard', 'Devices', 'License' (selected), and 'Settings'. The main content area displays the license status and activation details for the PC. At the top right, there are buttons for 'Session Default', 'Refresh pairing QR', and 'Test typing'. The license details are shown in a table:

License	
Status	Active
Type	Duration
Activation mode	test
Product	
License key	—
Account	—
Expires	—
Remaining	Permanent
Offline valid until	—
Last validated	—
Device ID	

Below the table, there are buttons for 'Open Eifaham portal' and 'Deactivate locally'. A note states: 'Clearing local activation does not delete your website license – you can activate again per your plan.'

7. Android companion

The phone app pairs over LAN, supports offline unlock for local capture, and mirrors the brand theme.
